A company in New Jersey is making paper counterpanes and pillow-shams. Number one Manilla paper is used, two large sheets being held together by small twine at intervals of three or four inches, gummed so as to stick the sheets together where the twine lies. The twine strengthens the paper. The margin of the counterpane has a hem, in which is more of the twine to keep it from tearing. Beautiful designs are printed on the upper surface of the counterpane and pillow-shams; which make a very neat appearance. When they become wrinkled they can be made smooth by hot flat-irons. They retail at 75 cents a set. The counterpane can be left on the bed when it is occupied, if so desired and in cold weather it will be found a very nest and warm article of bed clothing, since. the paper will prevent the escape of heat about

AN IDYLL. Boneath a shady tree they sat He held her hand, she held his hat I hold my breath and lay quite flat. They kissed -I saw them do it. He held that kissing was no crime: She hald her head up every time: I held my peace and wrote this rhyme. While they thought no one knew it.

THE EMPEROR BELL. The "Kniser Glocke," or Emperor bell was east out of twenty-two cannons captured from the French during the late war and a few field-pieces of the time Louis XIV., taken during the Palatinate wars. Its weight is twenty-five tons the clapper sixteen hundredweight, heigh twelve feet, circumference thirty-three feet eleven feet, while some may be gathered of its size by the fact that fourteen men can stand inside it. The melting of this immense mass of metal consumed ten tons of coal, and when the fiery stream was turned on, it flowed\_continuously for thirty minutes into the mouth of the casting ! before it was full to the brim, and the science, because, as they say, it is the Gospe gigantic mass took three weeks to cool.
